

Where is it?

Age: Explorer (8 - 18 months)

This activity helps your child's development in this domain: Cognitive

What You Need:

- A safe toy such as a stuffed animal or ball
- A napkin or cushion

What To Do:

1. Show your child a toy; then place it under a napkin or cushion so that only part of it is showing.
2. Ask him, "Where is your _____ (name toy)?" Then point to the part of the toy that is sticking out.
3. When he uncovers the toy, praise him. For example, "You found it!" Your baby will gradually learn that the whole toy is still there even though he can see only part of it.
