

Sock Puppet

Age: Toddlers (18-36 months)

This activity helps your child's development in this domain: Social-Emotional, Physical, Language and Literacy

What You Need:

- An old pair of socks
- Washable markers

What To Do:

1. Slip a sock onto your hand and use markers to draw eyes near the toe end. Do the same with the other sock.
2. Together, name the puppets.
3. Help him put the sock on his hand and show him how to move his thumb and other fingers to make the puppet "talk."
4. Put on your puppet and start up a conversation between the two puppets—maybe your puppet can pretend that he is going to Aunty's house.
5. Have the puppets do other activities like pick up objects, tickle one another, or pinch little noses!
