

Find the Sound

Age: Explorer (8 - 18 months), Toddlers (18-36 months)

This activity helps your child's development in this domain: Language and Literacy

What You Need:

- Ticking alarm clock or timer

What To Do:

1. Ask your child to cover his eyes.
2. Hide the clock or timer (under a cushion or blanket, behind the sofa, etc.).
3. Have your child uncover his eyes and find the ticking clock by listening, giving hints as needed such as "Do you think you should look under the cushions on the couch?"
4. As his listening skills develop, hide the clock in more difficult places.

Variation: If you don't have an alarm clock or timer, try using a cell phone with its alarm activated.
