

Car Wash

Age: Toddlers (18-36 months)

This activity helps your child's development in this domain: Physical

What You Need:

- Sponge
- Bucket
- Baby Shampoo
- Riding toy or pretend cars

What To Do:

1. Fill a small bucket with soap and water.
2. Encourage your child to wash his car using the sponge. Show him how to use his fingers to squeeze the sponge out and work those fine-motor skills!
3. After he is finished washing his car, help him to hold the hose and aim it at the car to wash off the suds.

Safety alert! Young children can drown in just a few inches of water.
